(54) PROGRAMMABLE COPYING MACHINE

(57)Abstract:

PURPOSE: To simply patternize even a complicated job by collecting those which are required among sorting patterns and registering them as one pattern.

CONSTITUTION: The titled copying machine is provided with a sorter 22 connected to a copying machine body 21 and provided with plural bins for storing a copy form discharged therefrom, a computer 23 functioning as a controller connected to the copying machine body 21 and for controlling the stored state of the copy form stored in the respective bins of the sorter 22, and an input/ output apparatus 24 connected to this computer 23 and for inputting and outputting necessary data. Also, plural sorting patterns functioning as sheet number information of the copy form stored in each bin are stored, and one or plural arbitrary patterns among these sorting patterns are registered as a pattern of one unit, respectively. In such as way, data constituted of plural sorting patterns can be processed simply by a job unit.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision
of rejection]

[Kind of final disposal of application
other than the examiner's decision of

rejection or application converted
registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's
decision of rejection]

[Date of requesting appeal against
examiner's decision of rejection]

[Date of extinction of right]
